

# RATNESH SAHU

Lead Developer

M.+91-9167286761

Email- [sahu4may@gmail.com](mailto:sahu4may@gmail.com)

I have over 10+ years of experience in .NET development, with a strong track record of delivering complex projects across healthcare, insurance, finance, travel, credit card, and employee benefits domains. I am proficient in all phases of application design, development, and testing, with deep expertise in Agile methodologies. In addition, I bring hands-on experience with Microsoft Azure, React, and Generative AI technologies.

## Work History

2024 Feb  
To Current

### Technical Manager / Lead Developer

PwC India, Pune, MH,

**Skills Used - .NET Core & Azure Developer | Expertise in Web APIs, C#.Net, React, DevOps CI/CD, SQL Server, Entity Framework, GIT, GitHub Copilot, Generative AI, LINQ, Agile Scrum Methodology, and Microservices Architecture.**

**Project - Regulatory Compliance & Reporting Insights** is an on-premise SaaS solution designed for the BFSI sector, enabling banks and non-banking financial institutions to automate compliance processes efficiently. The system integrates AI-driven content analysis to interpret and summarize RBI circulars, ensuring seamless regulatory adherence across various organizations, including banks, Flipkart, Myntra, and other enterprises.

**Used Azure Services** -Azure App services, Storage account like Blob Storage ,Azure Function ,Azure Key Vault Service , Redis Cache, Azure Application Insight, Azure Service Bus,DevOps for CICD Pipeline, Docker .

### Key Features & Modules:

- Content Review:** AI-driven extraction of relevant information from legal documents, auto-filling regulatory fields for review and action allocation.
- Action Tracking:** Monitors circular-related tasks, including task status (New/In Progress/Completed), compliance status, evidence submission, and approval

Skills

C#/.Net 4.0/.Net Core/

GenAI /MS Azure

Microservices/MVC 5.0

workflows.

- **Compliance Assessment:** Enables assessment of newly received circulars with self-certification processes, allowing users to determine implementation status.
- **Regulatory Reporting:** Facilitates RBI-mandated reporting, including Defaulter Reports, Bank Credit Reports, and Liability Reports.
- **Compliance Advisory:** Supports departmental query management, ensuring responsible personnel provide timely responses.
- **Regulatory Inspection:** Automates RBI audits by tracking compliance adherence, generating findings, and managing corrective action plans.
- **Event Management:** Internal module for creating, assessing, and mitigating risks associated with compliance-related events.
- **Compliance Risk Assessment:** Helps in evaluating regulatory obligations and submitting necessary assessments for approval.

Each module integrates interactive dashboards with **pie charts and linear charts**, displaying actionable insights such as task status breakdown (Total, Completed, Open, Closed, Due, Overdue), ensuring comprehensive monitoring and control.

This system provides a highly configurable ecosystem tailored for banking institutions, fintech platforms, and organizations seeking robust compliance automation.

### **Key Responsibilities -**

**Team Management:** Led and mentored a team of developers, assigning tasks, conducting code reviews, and ensuring timely delivery of project milestones.

**Individual Contributor:** Actively contributed to development by writing clean, efficient code, implementing critical features, and taking ownership of end-to-end modules.

**Client Interaction:** Gathered requirements for enhancements and implemented improvements through regular collaboration with
